PYRITE

The fiery stone from the core of the Earth.

This BOMMA collection was inspired by pyrite, the golden fire-stone in the shape of a perfect cube, while the silver version of the shade reflects its inspiration in salt crystals. By blowing a molten organic substance into a precise cold form, the skilled hands of our glassmakers create a unique light fixture of elemental, yet perfect shape. The gleaming surface of this hand-blown crystal cube is enclosed from three sides by a polished metal component in either silver or gold tones.

All Bomma products are hand-made from mouth-blown lead-free crystal. Therefore any small bubbles, non-melts and irregularities in the glass are both proof and a characteristic feature of this traditional craft.
